8	Flex Sander Red	058640000
9	800 grit Wet-Dry Sandpaper - 4pc	0584300180
10	Canvas Tool Bag	171593610

1 WURTH Polishing Cream

WURTH Polishing Cream will clean, polish and protect any non-porous surface safely, with no abrasive ingredients. WURTH Polishing Cream will work wonders on brass, copper, silverplate, sterling, chrome, stainless steel, nickel, bronze, gold, aluminum, anodized aluminum, pewter, fiberglass,

Corian, glass, Formica, acrylics, Plexiglass and all Powdercoat and Gelcoat painted surfaces.

The cleaning agents will aggressively remove tarnish, rust, water stains, oxidation, bugs, tar, bird droppings and fingerprints. The finish left behind will resist tarnish and make future cleaning easier.

WURTH Polishing Cream leaves a layer of clear protection on treated surfaces. On fiberglass and gel-coated boats, you can expect 6 months of durable protection in fresh water and 3months in salt water.

Auto/Truck/Motorcycle Uses

- Wheels
- Bumpers
- Exhaust Stacks
- Running Boards
- Chrome
- Fiberglass Surfaces
- Valve Covers
- Motorcycle Casings
- Headers
- Clearcoat Paint
- Powder Paint
- Gelcoat Paint

Indoor Uses

- Door Hardware
- Faucets
- Stainless Steel Sinks
- Shower Doors
- Fireplaces
- Outdoor Lighting
- Window and Door Frames
- Leaded Glass
- Trophies
- Brass Beds
- Silver
- Shower Enclosures

Marine Uses

- Stanchions
- Bow Rails
- Hardware
- Port Holes
- Winches
- Fiberglass
- Plexiglass
- Eisen Glass
- Knives & Lures
- Railings
- Outriggers
- Rods & Reels

2 WURTH Spray Wax

WURTH Spray Wax is complete wax protection in an easy-on spray formula. Protect your car's paint with real Brazilian carnauba wax for 3 months! It takes the tedious work out of waxing your car! Spray it on, wipe it off, and enjoy the glossy finish for up to 3 months.

WURTH Spray Wax gives your vehicle the gloss and protection of carnauba wax, without the work.

The liquid spray does not haze and leaves no white residue. It fills in fine hairline scratches and minor swirls in just one step.

WURTH Spray Wax wipes off to a streak-free shine. It requires no difficult buffing and there's no need to use a cotton swab around emblems. The wax leaves no white chalky residue. Spray it on and wipe it off.

WURTH Spray Wax wipes off to a streak-free shine. It requires no difficult buffing and there's no need to use a cotton swab around emblems. The wax

WURTH Spray Wax is water-based and therefore safe for your vehicle. Petroleum distillates can dry out automotive paint over time. This water-based formula is also better for the environment as it does not contribute to ozone, like solvent-based products do.

WURTH Spray Wax can be used on nearly any solid surface: clear coat, gelcoat, lacquer, fiberglass, auto paint, marine finishes, ceramic and powder coatings, polyurethane, Plexiglass®, Eisenglass, acrylics, plastics and chrome. Indoors, use it on marble, granite, Corian, stainless steel, tub surrounds, shower doors and more!

A little goes a long way! You can cover approximately 1,100 sq. feet with one 16 fl oz bottle!

We recommend using a microfiber towel (included in kit) to buff off WURTH Spray Wax.

3 1000-Grit Scuff Pads

#1000-grit scuff pads are made from resin-coated non-woven synthetic fiber material so rust isn't an issue like it is for steel wool. The resin-coated, non-woven scuff pads are equivalent to 1000-grit sandpaper so they are very aggressive to make your restoration project faster and easier.

Three dimensional abrading action!

These pliable scuff pads measure 1/4" thick from non-woven, non-directional individual fibers. Each fiber strand is coated with an abrasive resin material which provides you with multi-dimensional abrading action instead of a singular, non-dimensional surface. This three dimensional feature means you get more life out of each scuff pad with greater versatility for use.

Features

- Long-lasting cutting ability
- Flexibility - pads conform to surface being sanded or scuffed
- More uniform material removal - flexibility means equal pressure over curved surfaces
- Can be used wet or dry - maximum performance either way
- Perfect for quickly sanding oxidized, yellow and hazy headlight lenses
- Can be used multiple times
- Perfect for pitted surfaces

Uses

- Hard plastics
- Wood
- Composite materials
- Anything you would sand with sandpaper

**FROM
OLD TO NEW
IN MINUTES!**

4 Orange 5" Buff Ball

The 5" Buff Ball cleans/polishes in minutes, what otherwise would take hours. Keep wheels, diamond plate and more shining - without a lot of hard labor.

It works with electric drills and air tools. The 6" by 3" thick buffing ball, made from soft Italian viscose fiber, can be operated at up to 2000 rpm. The ball fits any standard 3/8" or 1/2" drill or air tool (not included). Works great with WURTH Polishing Cream.

The 5" Buff Ball will buff out scuffs, oxidation, tarnish, brake dust, pitting, corrosion on ALL metals, painted surfaces, fiberglass, plastics, Eisenglass and wood. It works great on textured or smooth surfaces. Cleans diamond plate in seconds! Buffing your auto's paint was never easier.

Hard to reach areas? No problem! The rounded shape will reach into hard-to-get places like mag wheels, grills and spokes. Can be used safely on all metal, painted, fiberglass and plexiglass surfaces.

This is must have for marine too! Perfect on fiberglass, side rails, pontoons, propellers, windshields...and more!

5 Yellow 2" Mini Buff Ball with Extension Shaft

The Yellow 2" Mini Buff Ball with Extension Shaft goes where most polishing tools can't with its compact polishing head and 8-inch extension shaft. Use this tool to buff motorcycle components, spokes, engines and more! It buffs tight areas to a bright shine quickly and easily!

It buffs away polishes and waxes with incredible speed. The Italian viscose tabs gently whisk away wax or polish haze from even the most recessed areas of your vehicle.

The Yellow 2" Mini Buff Ball with Extension Shaft works on ALL surfaces - metals, plastics, Eisenglass, Plexiglass, painted surfaces and more. The ball glides over textured surfaces without catching or tearing. Use it on large smooth surfaces to buff away wax faster than you can by hand. The round ball fits into concave areas and buffs over contours easily.

The built-in 8-inch shaft gives this tool its long reach. The shaft is covered in a soft plastic sleeve that will not scratch any surface. It attaches to any standard 3/8" or 1/2" drill or air tool (not included). The ball can be washed with your regular detergent (air dry).

Viscose is a tough material that does not shed lint and resists tearing. If you accidentally buff over a sharp edge, the ball will not rip like foam pads can. It will not overheat or cake up with product. The viscose is cut into multiple tabs of different lengths, which increases the ball's surface area and its ability to buff away a lot of product before it ever needs washing.

6 WURTH Mask

- High quality tape
- Tape strips clean with no residue or paint flake after oven baking and extended application time
- Use on metal, rubber or plastic
- Replaces 2" tape & works 30% faster
- Paper & tape made in the USA

Description	Art #
25 lb White Polycoated Paper - 65' x 6"	0818065

7 Microfiber Detailing Cloth

The super-absorbency and magnetic "clinginess" of the microfiber fabrics make it especially well suited for cleaning and beautifying automobiles.

Great for Cleaning:

- Windows
- Leather
- Rubber and Plastic
- Car Interiors
- Chrome
- Monitors

Microfiber Detailing Cloth	1899810

8 Flex Sander Red

Art. # 058640000

- Soft rounded edges virtually eliminate gouging
- Tapered edges for sanding hard-to-access areas
- Super lightweight and designed for comfort no matter how they are held
- Extremely durable & resistant to most solvents
- Blocks will maintain curvature until sandpaper is removed

9 Wet-Dry Sandpaper (Adhesive Backed)

Art. # 0584300080

- Sandpaper adheres while submerged in water!
- Soft and flexible
- Does not load up
- Outlasts other by four times
