

DBS 3600

- A. Special material with heat treatment on entire wire -for longer life.
- B. Rubber safety flap for improved protection during use.

- C. Stronger structure design on the rubber eraser offers better stability and longevity (eraser for water based paint is also now available).
- D. Single and double wheel are both available for applications.
- E. Tighter contacting between the wire brush and adaptor - no bending wire while in use.
- F. Thumb-activated for better control.
- G. Professional rubber-coated handle grip for comfort and less vibration.
- H. Special treatment on the bevel gear for more stability and longer lifetime.
